

# Your Hometown Pharmacy

## Pharmacy Services Include:

### Sync your Meds

An EASY, CONVENIENT, AND FREE way to have all your prescriptions filled the same day each month.

### Immunization Destination™

Each and every Discount Drug Mart pharmacist is certified to administer immunizations for Influenza (Flu), HPV, Pneumonia, Shingles, Whooping Cough, COVID-19, and MORE!

### Children's Antibiotic Follow-up Program

Our pharmacists will make a call after two days of therapy to ensure your child is tolerating their medication.

### Diabetic Testing Supplies

We carry all major brands of diabetic testing supplies and are able to bill those products to most insurance plans including Medicare.

- Medication Therapy Management
- Pet and Animal Medications
- Text and Email Notifications
- Online Prescription Management
- Pro Points and much more!

*Specialty Pharmacy of Discount Drug Mart*

At Gentry Health Services, a division of Discount Drug Mart, we are an actively involved care partner helping to create a pathway to better health for our patients. We understand the challenges people with complex health conditions face on the journey to manage their unique and often complicated medication regimens. We aim to simplify their lives.

With education programs, individualized counseling and 24/7 assistance, Gentry Health Services provides unparalleled support for both patients and providers. Our holistic and innovative strategies are designed to assist with adherence and improve patient outcomes.

## Disease States Include:

- Psoriasis/Psoriatic Arthritis
- Rheumatoid Arthritis
- Hyperlipidemia
- Multiple Sclerosis
- Hepatitis
- And many others!

Let our professionals become your personalized care team for your specialty pharmacy needs.

## Patient Management Program

Available to all who utilize Gentry Health's Specialty Pharmacy.

Our programs are used to provide the following key benefits:

- 1 Individualized education and training to support the safe administration of medications and adherence to the patients medication regimen.
- 2 Access to highly trained clinicians who will facilitate therapeutic monitoring and care management between patients and health care providers to ensure that the prescribed therapy is safe and appropriate.
- 3 Support for secondary conditions and symptoms our patients may have.
- 4 Access to courteous, professional staff that will assist in making the entire process convenient and less stressful.
- 5 Communication to the prescriber with very important details of each patient's care for faster intervention when necessary.
